

# Who is polluting the sea?

the sea of Amantea is dirty because of landfills, the boats and the people who instead of taking home their garbage they leave the beach or throw it in the water

# Not all that is beautiful to look is perfect

In the summer the sea of Amantea gets dirty with floating objects and splashes of color brown

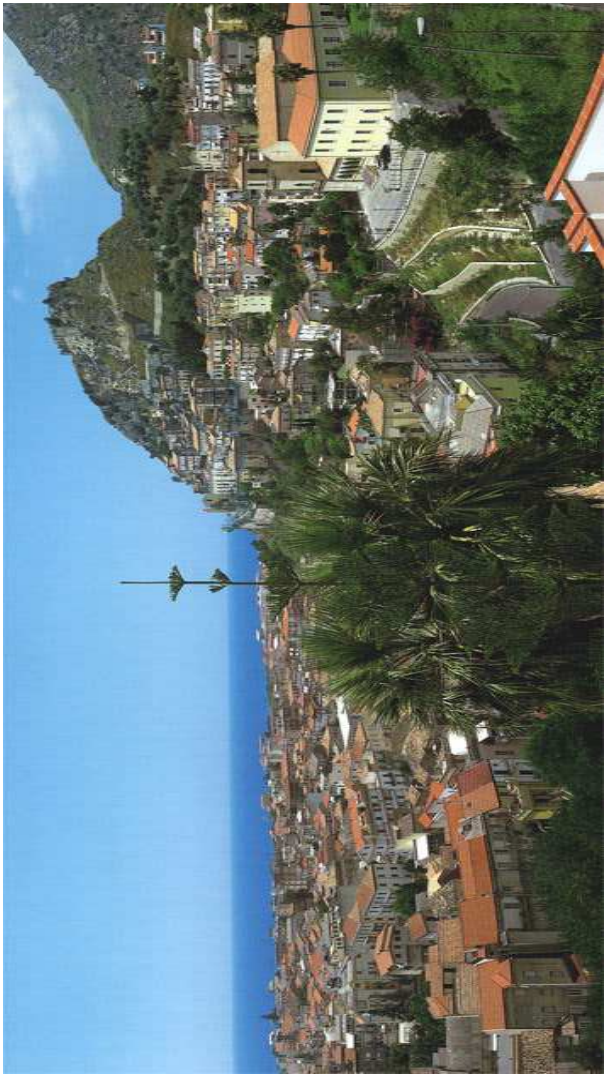

there are also ships carrying toxic and radioactive waste that does not only harm the environment but also human beings.

# This is The sea of Amantea

This is our  
beautiful sea
